PART 1 - GENERAL

1.1 Related Sections

- .1 This section shall be read in conjunction with specification Section 26 05 00 - Electrical General Requirements, all electrical sections, and all other disciplines related to the project.

1.2 Relevant Standards

- .1 Telecommunications Industries Association.
 - .1 EIA/TIA-568C, Design Guidelines for Telecommunications Wiring Systems in Commercial Buildings.
 - .2 EIA/TIA-569-B, Commercial Building Wiring Standard, Addendum 5 - Transmission Performance Specification for 4-Pair 100 Ohm Category 5-e Cabling.
 - .3 EIA/TIA-606-B, Design Guideline for Administration of Telecommunications Infrastructure in Commercial Buildings.
 - .4 EIA/TIA-607-B, Grounding and Bonding Requirement for Telecommunications in Commercial Buildings.
- .2 Certification under the Panduit Structured Cabling Program (PAL), is required.

1.3 Before Proceeding with Project

- .1 Before proceeding with any installation work, vendor shall submit a system specification to the above office for verification and acceptance via response to Request for Quote (RFQ), where requested by OCDSB.
- .2 Submit shop drawings and product data, to assist client's internal configuration of system and in other areas, where appropriate, in accordance with specifications, where requested by OCDSB.

1.4 **Current Acceptable Data Installers (Cabling Prequalification 13-034)**

- .1 Fleming Communications (FCI)
- .2 Davidson-Violette and Associates Inc. (Adasca)
- .3 Bell Canada
- .4 Marcomm
- .5 Com-Net

1.5 Standard of Acceptance

- .1 It is the responsibility of the general contractor to obtain Tender quote from the telephone/data communication cabling sub-contractor and submit to include all services. It is also the responsibility of the general contractor to manage the sub-trade for performance and co-ordination on site and contractual management.
